# See All That Sea Girt's Site Has to Offer!

Sea Girt is "where the cedars meet the sea" and Sea Girt's website is where government services meet digital convenience. It's now home to a wealth of GovPilot tools that empower residents to quickly and easily report concerns as well as obtain permits, licenses and information.

Digital Permit Application /Registration Forms

Sea Girt has left PDFs in the past. Residents and business owners can now enjoy 24/7 access to digital, e-commerce enabled applications for permits and registrations. Simply grab your desktop, laptop or tablet, enter details, payment information, add any necessary attachments and click, "Submit". Streamlined government operations cut processing time as automated alerts provide status updates.

Digital forms expedite the following processes:

- Annual Fire Registration for Commercial Properties
- Certificate of Continued Occupancy for Commercial and Residential Properties (for all Sales and Rentals)
- Zoning Permit Application

Digital Report a Concern Form

Worried about a pothole, missing street sign, or other non-emergency? Let the appropriate Sea Girt official know through a digital Report a Concern form. Like Sea Girt's digital permit application/registration forms, the Report a Concern form can be accessed at all times, via desktop, laptop or mobile device. Disclose the location, nature - even upload pictures of the issue! - and hit "Submit". The concern is routed to the appropriate official in real time. Reported concerns are addressed swiftly and effectively, with automated alerts updating residents at key points in the resolution process.

GIS Map

The geographic information system (GIS) map offers citizens an easy-to-digest depiction of commonly requested data sets, such as tax statistics on all properties.

Adjustable, color-coded map layers clearly and accurately illustrate Sea Girt's:

- FEMA Flood Maps
- Known Contaminated Sites
- Traffic
